After 10 halves, the mining of the CORN token will be completed!

Each era will start with a zero balance and end when 100,000,000 corn have been caught!

At the end of each era, the game will be stopped for 240 hours to claim corn tokens.

There will be 120 hours of REVIEW and 120 hours of HALVING period.

Players should connect their wallet before REVIEW period is started and they can claim their token as their balances during HALVING period using their wallet.

All game balances will be converted into CORN tokens and withdrawn to the cryptocurrency wallets of the participants connected to the bot!

After that, all game balances will be reset to zero.

The balances of players who have not connected cryptocurrency wallets to the game bot will be transferred to the project development team!

The CORN token will be launched on the TON network. With simultaneous listing on the popular CEX and DEX!
